

Testimonials for Susan's work

"Her presentation covered everything she has done and was so intense it was like getting decades of knowledge in two hours. We were dazzled. It was as if Kwan Yin the goddess of wisdom was teaching. The energy level was "through the roof".

"Susan Collins is not only a master dowser and brilliant teacher she is also a very generous author. Her books are filled with information that will invite you to refer to them again and again, as I have. I highly recommend Susan, either for an individual consultation, a class or one of her many information-packed books. You will be glad you did."

"A brilliant teacher of Dowsing! Susan has authored many books on dowsing and has taught it for years. Her teaching and writing style is consistent, eloquent and very clear for all new or master dowsers. She does it all seamlessly with ease and grace. And her greatest joy, one can easily see, is in the sharing and teaching of her dowsing skills for all to empower themselves."

Teresa Palamar, Past President, Canadian Society of Dowsers

Susan "started her career as a dowser after she had cured her long-standing illness with Dowsing Techniques. Advanced dowsing skills and a bright and caring personality are loved and respected by many. She developed her own space energy cleansing technique as well as human healing."

"I have been privileged to attend Susan's workshops over many years. She has helped me to be aware of another world, one in which trusted Guides are willing and able to help us. Her teaching and the sharing of her knowledge through scholarly lectures and publications has benefitted people all over the world."

Cofounder Hospice King, Wise Woman

"I have been a dowser for many years, and used dowsing for many things, but it was not until I was diagnosed that I learned how effective it can be for removing the nonbeneficial side-effects of treatments and for enhancing the healing process. I believe that working with Susan and using her methods has helped me to heal faster."
