Rev Susan Collins – Sept 21, 2025

Talk: What's Up in the Other Dimensions?

We're all familiar with the regular dimensions we describe as Length, Width and Height. We know about Time which runs mostly in one direction (forwards) but can be quite bendy on some days. But what about the 10 more dimensions that String Theory describes? Scientists say that these extra dimensions MUST be real – curled up in tiny vibrating strings that exist everywhere.

A lot of what String Theory, and on a broader scale Quantum Physics, describes doesn't make much sense to the average person, because it's not what we experience in our big day-to-day world. However, for those of us sensitive to realities beyond our "normal" perceptions and who have direct experiences of vibrations and consciousness that exist outside of Standard Reality, String Theory could provide the answer to "*where are these experiences coming from?*". Does other-dimensional consciousness exist in these vibrating Strings? Is this where Angels, Aliens, Ghosts and God itself exists?

Join me for a quick dip in the multi-dimensional universe!

Presenter Bio

Rev Susan is an internationally acclaimed author, keynote speaker and workshop leader with dynamic, professional practice. She uses dowsing to detect and transform nonbeneficial energy patterns. Susan has led workshops and presented live at conferences across North America, the UK, in Italy, Japan and in the Middle East and is an ordained Metaphysical Minister (CIMM).
